🔗 join the guild - Community event 🔗 🗨️ join the guild now for the chance to win awards! 🎁 CM Event Reward: 2,000,000 Gold for 200 Knights!! 🗨️ events ✓ 10/15 (Thu) No 10/22 (Thu) ? How to participate: Step 1. Join the new guild If you already have a guild, move on to Step 2. Or re-joining a new/current guild is also in order. Step 2. Take a screenshot in the lobby (it should show your character and guild signs/flag) Step 3. Post in comments: Screenshot and your nickname (IGN)/Server 🗨️ You'll have a better chance of winning if you dress/dye your character to match your guild signs (flag). Thank you. ----- Don't forget that you can also get in-game awards by joining a new guild (or rejoining the current guild) after the 10.15 update 🗨️1000 Gem 🗨️Rank S Chest Gear x1 in a previous post

we explained the detailed guide to the game Darkness Rises (check here). Today, in this post, we're going to share some tips and tricks to improve assassin's character in the game and get wins easy. Let's start the Darkness Rises Killer Guide, Tips and Cheats. Darkness Assassin Rises If you choose Assassin as the main character in Darkness Rises, you may face a challenge in difficult stages. Because HP Assassin's stats aren't too good. When faced with an enemy that is doing critical damage, chances are you will lose half of HP in one attack. But there are advantages; The speed of the killer attack is amazing. And thanks to this, you will be able to kill enemies who attack in a few moments. Besides, Assassin's defense is also good. But HP's poor stats make it boring and less effective. In this post, we shared some tips, cheats to increase HP stats and how to increase the power of the Assassin character in Darkness Rises. Darkness Rises Assassin Build - Increase Power #1.) Accessory - How to get and why to get a Assassin HP is very low, and if it gets 2-3 critical attacks, your game will be over. One of the best ways to increase HP stats by a huge amount is to get and equip the accessory. Accessories items can increase HP stats and many other attributes. Now, how do you get an accessory item? Complete the basic quest chapter 4, 6, 9 Full History Chapter Mode On the 14th day, you'll get a free chest accessory and just complete missions, challenges, daily quests, and you can get accessories as a reward or if you check the mailbox (in the top right corner), you'll get hundreds of gems for free. We declare all the awards. And go to the menu - zgt; breasts - the breast accessory - spend diamonds and get a chest accessory. But I would recommend that you get a suit first, because Breasts can be obtained by completing the basic quest chapters 4, 6 and 9. #2.) Suit - If you buy? At the beginning of the game, you have hundreds of diamonds. You can spend these diamonds in the store to buy in-game items like One of the rare elements in Darkness Rises is the costume. If you equip the suit, the power of The Assassin will increase by a huge amount. After a certain level, Assassin will not be able to get a win because of the low power. One of the best ways to improve the power of Assassin is to receive and equip the costume. How to get a costume for free? After six days, you can claim the breast suit for free (menu - breast - zgt; suit) login for seven days continuously to get a free breast suit If you can't wait, it would be best to spend some diamonds in the store and get a chest suit. You don't have diamonds? Complete the basic quest and you'll get free diamonds to complete all the daily tasks and get a free 100 diamonds go to the tab quest - the weekly mission - take - qgt; complete all the missions and get a free 200 diamonds or more click mailbox icon and as a beginner award, will you get hundreds of diamond costume or chest accessory? It would be better if you spend diamonds to buy a suit. Because you get a chest accessory after completing the basic chapter 4 quest. #3.) Equipment and gear update You can read the guide to the broadcasts here. As you know, the power of Assassin's attack is also low when compared to Berserker and the Wizard. And to increase the power of attack, you need to improve the set of gears. How to get gears for the assassin? Complete quests Play adventure mode, duo dungeon, raid mode Claims gears breasts in the chest menu after every 24 hours Complete the main chapters of The Breast Play Story mode #4.) Improving the attributes of Assassin Go in the menu - the character - the essence. Here you can align or improve the attributes of Assassin. It costs you an entity. Play adventure mode to get Essence. Or complete quests. #5.) To increase the skill of power in battle, we use skills to inflict huge damage to enemies. Make sure you upgrade Assain's skills. It costs you skill points. Level and earn skill points. Or complete the achievements. #6.) Craft Polish As you know, to enhance gear, we have to select material items first. And we often choose standard gears to upgrade high-quality gears. But Polish works better than these standard gears. Go to the menu, on the right side - zgt; click the craft icon. Start crafting and after a certain amount of time, you will get polished. Use this element to enhance gears. #7.) Play PvP and earn points If you unlocked PvP mode, participate in it and win matches check out PvP tips here. After the victory, you will receive honorary points. Spend these honor points to get a precious chest. The precious chest includes jewels. What is a jewel? You can equip this item and improve the performance of the gears in combat. Go to transfer the tab - click qgt; Transfer - select jewels - place the jewel in an empty socket. You should check out this post if you want to know more about it. #8.) Play Daily Dungeon Your equipment level has a limit and you can't raise it after that limit. Once Once Maximum level, you'll have to upgrade it and upgrade the Assassin gear increases the level of the cover. To upgrade the equipment, you need to upgrade the stone. Play Dungeon Mode to purchase upgrade stones. #9.) Fast Tips for Darkness Rises Killer Character: - Improve HP Stats by equipping the accessory item Get Suit Improved Gear Update Gear Play PvP mode and earn honor points to spend honor points to get jewel breast performance assists by placing jewels Improved attributes, Using Essence Play Duo Dungeon and Raid Mode for Gear Perform basic quests for special Focus awards on daily tasks to steadily increase the power of Assassin Improving Skills Use to dodge skill in combat to dodge enemies Craft Polish fuse gears, run and jewels to get a higher class item Claims free chests and it would be better if you check this post (Rises - Tips) So, this is a short guide to Darkness Rises Assassin for beginners. Keep boosting gears, attributes, skills, and you're good to go. Repeat the stages of the adventure mode and play other modes of the game too for special rewards. Facebook Twitter WhatsApp Reddit Here are the build skills and combo models for players playing Assassin class in the dark rises, hack and slash action adventure Android and iOS mobile games. Assassin - a deft killer who wields double swords with virtuoso precision. Knocks out enemies with a whirlwind of blows. - Please refer to this guide first because I will no longer explain some things here including training, PVP Duel or Team Tips, Player Skill Value and more. - Link here: Darkness Rises: PVP Guide and General Assembling Skills (PVP and PVE) - Flash Lightning: 350% (12 seconds) - Throw double swords: 350% (15 seconds) 23.3 Buffered! - Shadow clone: 350% (17 seconds) 20.6 Buffered! - Backstab: 350% (18 seconds) - 19.4 Buffered! - Thunder Fang: 280% (16 seconds) - 17.5 - Freezing Scar: 250% (13 seconds) 19.2 - Moonlight Cut: 250% (13 seconds)) 19.2 - Dancing Blades: 250% (18 seconds) - 1 3.9 - Leaf Kick: 200% (15 seconds) - Freaky coil: 150% (11 seconds) - 13.6 - Lightning Flash: 350% (12 seconds) - Throw double swords: 350% (15 seconds) 23.3 Buffered! - Shadow clone: 350% (17 seconds) 20.6 Buffered! - Backstab: 350% (18 seconds) - 19.4 Buffered! - Freezing Scar: 250% (13 seconds) - 19.2 - Moonlight Cut: 250% (13 seconds) - 19.2 - Thunder Fang: 280% (16 seconds) : 250% (18 seconds) - 13.9 - Freak reel: 150% (11 seconds) - - - Leaf Kick: 200% (15 seconds) Note: Lightning flash is best used after the Stun-Plague coil, but still bad if the targets are not pushed during the PVP team. - Backstab is Initiator and stun the skill, you have to master how to use it properly because it's cooling a little long. One way is to move until you see the enemy right on the edge of the screen and then quickly move forward for a few steps and perform. - Easier against non-moving enemies like wizards who love spam automatic attacks. - Backstab can also be used right after the enemy dash or use any skills, just time is good. - Trick: to bait them to use a dash, just run to them, then use 1 automatic attack, sometimes they will dash to your backside, it's time to use the perfect backstab! - Thunder Fang is your base of nuclear skill, upgrades early on to massively increase its damage output! - Combo: Backstab qgt; AA's Dancing Blades , aa zgt; Thunder Fang aa - If you've been able to pin the enemy to the wall after a combo, make another AA while the enemy is on the ground. - Stunning locks are awesome, allowing you to deal with so much damage and auto attacks, but watch out though because they can sometimes move away because of their Stun Recovery stat. If that happens, don't use full AA while stunned, 1'2 hits will do. - Dancing Blades can also be your initiator of skill in case your Backstab is missed. Dash to the enemy and perform, or use any hidden moves you have. - Combo: Backstab qgt; AA'gt; Thunder Fang's aa'gt; dash forward to the Dancing Blades of the zgt; if stunned, do AA, otherwise use the block then dash away. - This is the case if you used Thunder Fang in the first place. - It is highly recommended if you are having trouble connecting your dancing blades, or would like a different approach. This build is 2-1 Combo Skills, i.e. use only Backstab and Thunder Fangs as a combo while the shadow clone will be used as a spam skill, use it whenever it is ready. - Use only all 3 if you get a chance: Backstab's a.k.a. The Thunder's aa'gt' shadow clone. - If you're close enough after dodging an attack you can actually connect the Shadow Clones to the Thunder Canine too! So you can maintain a good DPS even if your Backstab misses, for example. - Combo: Backstab's qgt; AA's Leaf Kick qgt; AA's Thunder Fang (AA if pinned to the wall) - Note: Doing 2 AA after a sheet kick is possible, but won't always get involved with Thunder Fang. - Leaf Kick's Defense Reduction Debuff can increase your next attack, which is great. - The only downside is that once your Backstab is missed, your moves are pretty hard to execute as well as predictable, so master your backstabs well. - If the base damage of Leaf Kick is much higher, I highly recommend it, otherwise it's better to update it to more levels if you like, and once you max out your basic skills. - Other skills can be too, depending on your preferences or style of play. - Feel free to share your thoughts too. ^^ - All skills with 250% Base Damage (check list above) can also be used with Backstab and Thunder Fang, but their upgrades will also diversify your skill points, so I would recommend focusing on a few skills first in the early-mid game for all around use. - Learn other skills that both on later levels, since you will be able to max them all anyway. - These 3 are still the best skills to master for PVP. - Automatic killer attacks are very fast, unfortunately you don't want to stay long if there are enemies nearby. Dash in and out of battles to avoid getting huge losses. - If all your skills are under cd, use quick automatic attacks to help your teammates, but watch out for enemy attacks, dash out at once. - Use your block, counter, and dodge if necessary. - You have the fastest moving speed, so use to collect Buff and Life Orbs while your skills are in cooling mode. - Unlike Duel PVP, the PVP team will give you plenty of opportunities to accurately use your skills, so abuse your stun skills and lock enemies for your teammates. - Remember that the Assassins are still kinda squishy so stun skills are your best ally for the PVP team. - Backstab is your initiator of skill and then use Dancing Blades right after to also stun other enemies nearby, a perfect crowd control combo that can also provide survivability. Just be careful not to dive into the clash of animation attack skills because you can get caught and catch huge losses as well. - If your teammates know what they are doing, your team can probably kill at least one of them during the first collision. - Combo: Backstab zgt; Dancing Blades ,gt; Thunder Fang aa zgt; AA (if pressed against the wall) - As always, you can still get AA after kicking them in the air for extra damage if you get a chance. - The main role of this build for the PVP team is to nuclear enemies with a high overall level of damage output, cooling a little long, but DPS is still good, just make sure to connect your skills. - One thing where Thunder Fang is also good for getting ring outs. If you see enemies standing near these edges, use your stun skills, then quickly undo your character and use Thunder Fang and AAs (to a greater distance) to push them out of the ring. - It may or may not work, but it's still worth the shot. - With Dancing Blades, you can ring out all 3 characters if you're lucky, lol. - If you want to play a different approach, replacing Dancing Blades with a clone of the shade. Follow this build if you use Backstab, Thunder Fang and Shadow Clone for the PVP duel. - Contact 2-1 Skills Combo #1: Alternative DPS Build-AoE section below for more information. - Freezing Scar, Leaf Kick, Moonlight Cut, and Throwing Double Swords are possible alternatives to Thunder Fang (or Thunder Fang and Dancing Blades), but I would recommend sticking to Thunder Fang to allow you to focus on a few skills first in the early-mid game for all around - Learn other skills that you like on later levels, as you will be able to max them all anyway. - Other skills can be too, depending on your preferences or style of play. - I did not mention them all because some of them are difficult to perform or use with other skills, the risk is not worth it, or they are more effective against weak opponents. - Feel free to share your thoughts though. ^^ the approach that I use for the PVP command is because they give a higher DPS output! Note that the above build is still viable for late games, these are just alternatives to also try other skills. - Go all and spam your skills if there are enemies nearby because you get interrupted if you use Auto Attacks when performing combos skills, after that, just dash away. - Just like our basic skills build higher, but this time only use Backstab and Thunder Fang as your 2 Skills Combo. - Use Shadow Clone as a separate solo skill and spam as soon as it is available. It has a long-range AoE line and can pass through walls, try to hit multiple targets with this. - 3 Skills Combo Nuke: Backstab's Thunder Fang's Shadow Clone - Only if all 3 skills are available, gives great DPS and Nuke damage! - Pros: Stun!, Combo easy to connect to AoE, Good overall DPS, and can make 3 Skills Combo Nuke! - Cons: No noticeable ... DPS is however almost the same with the art construction above, but with the art of AoE. - It's much more interesting because you can use 2 Combo Skills every 13-11 seconds, which will give you a higher DPS, just purely hit your Moonlight Cut to sink in the next skill (it moves forward, so use that). - Freezing Scar also have a debuff reduction attack, good for team play. - Note: Even if some attacks are not hit, the overall DPS is still pretty high with these 2 skills. - Shadow clone: Same as above. - 3 Skills Combo Nuke: Moonlight Cut's Freezing Scar is a clone of the shadow - Only if all 3 skills are available, gives excellent DPS and Nuke damage! - Pros: Excellent overall DPS, Attack Reduction Debuff, and can make 3 Skills Combo Nuke-AOE. - Cons: No Stun!, Combo is a little difficult to connect, but still possible. - Throwing double swords was my first choice over the clone shade, but after checking it carefully, it looks like you can only get it full of damage potential if the target is in spinning swords. The goals that stand right in front of you will get only a few damage! - Other skills can be too, depending on your preferences or style of play. - I did not mention them all because some of them are difficult to perform or use with other skills, the risk is not worth it, or they are more effective against weak opponents. - Feel free to share your thoughts though. ^^ - Once you figure out what to use for AVP, you can now easily choose which PVE skills to get. - Moonlight Cut - Thunder Fang: 270% - 260% (13 seconds) - 40.8 - Leaf Kick - Freezing Scar: 270% - 230% (16 seconds)29.5 - Dancing Blades and Plague 300% - 200% (16 seconds) - 31.3 - Backstab - Shadow Clone: 300% and 300% (19 seconds) - As far as it is possible only to focus on 3 tree skills for PVP and PVE, to maximize your skill points, especially in until the middle of the game. - Try other skills as soon as your basic skills are maximum. - Based on the recommended PVP skills above, use and upgrade the following skills. - Known DPS for PVE, there is no need to update Cut an early game if it is only used for PVE, but make an update if you need more firepower, and once you get extra skill points, cover their Lvl 9'30 first (multiple 3). - Max Thunder Fang to increase damage and reduce cooling. - If you want to use Moonlight Cut for the PVP team, update more later. - Max Dancing Blades is basically to reduce coolness as soon as possible, but if you basically use Shadow Clone for PVP, just cover it lvl 9'30 (multiple 3) for PVE or PVP. - Only upgrade the Plague coil if you need more firepower for PVE and once you get extra skill points, cover their Lvl 9'30 first (a few out of 3). - Update the shadow clone if you need more damage for PVE, but cover them too Lvl 9'30 first (a few out of 3) to save the SP for your basic skills. Max, if used for duel and PVP command, otherwise cover it Lvl 30'45. - Max Backstab, basically, to reduce coolness as soon as possible! - In case the skill is not yet unlocked, just go for any skills at the moment, but don't upgrade them. Note that it is best to use a temporary skill with Combo Skill unlocked for PVE due to higher damage power (250% and 200% better than using one 300% enhanced skill, for example). - Please note that this is not the only way to play Assassin as well to try other skills as well since you can max them all in the end. - If you find any discrepancies with the skills information above (basic damage or CD) due to updates to game patches, please let us know, thank you. - Hope you find our skill to build useful, good luck! ^^ Related Darkness Rises: Tips and Guides: - Darkness Rises: Fast Beginner Tips, Tricks and Strategy Guide - Darkness Rises: PVP Guide and General Skills Builds (PVP and PVE) PVE)
